

*Organic by Bühler –
The ecological top-quality*

Top yarn quality from Organic Cotton

Count range	Ne 30 – 95 (Nm 50 – 160)
Spinning system	combed, ring-spun
Raw material	100 % organically grown, extra long staple cotton fiber length: 34 – 38 mm
Origin	Switzerland

Typical applications

- high grade woven fabrics for shirts and blouses
- fine intimate apparel
- hosiery
- fiber- and down proof fabrics (bed ticking)
- bed linen
- children's wear

Quality certificates

- EKO-Label Skal 5014
- swiss+cotton®
- Supima®

Ecological advantages

- Pests are controlled by natural measures – no pesticides or insecticides are used
- Compost and manure replace synthetic fertilizers
- 25 % lower water consumption thanks to better water retention capacity of the organically cultivated soil
- crop rotation for long term maintenance of soil fertility
- defoliation through natural frosts and discontinued irrigation
- electricity for spinning SwissCotton Organic® is generated by renewable water power

SwissCotton Organic® is directed to a group of buyers who are environmental conscious, but at the same time, demand a quality product. The organic cotton we use meets the strict EC-rules for organic agriculture. From the cotton field to the spinning mill, the production process is inspected and certified by Skal, an independent organization. The EKO label stands for organic agriculture where agrochemicals are not applied. Therefore, harmful residues on the finished product are impossible.

The silky appearance and the soft hand of the organic Supima®-Cotton we use, meets our and your highest quality requirements. By a close collaboration and long term contracts with selected farmers, we safeguard continuity in organic cotton cultivation and your continuous supply with SwissCotton Organic®.
