Quality certificates

- **Modal Micro®**
- **Oeko-Tex Standard 100 plus**

Lenzing Micro Modal, the fiber SwissModal Micro™ is spun from, is exclusively based on European beech wood. A soft and cool hand, combined with a flowing drape, are the characteristics making textiles from Micro Modal an incomparable experience. Even after numerous washings, fabrics from Micro Modal remain soft and silky, the colors bright and shiny. Micro Modal is gentle to the skin and provides highest comfort. As the skin can breathe, it remains always dry.

Thanks to Bühler's expertise in ring- and royal spinning, the outstanding fiber properties can be transferred into the final product perfectly. With the new royal-spinning technology, all fibers are spun firmly into the yarn, which results in minimum hairiness and outstanding pilling properties. Top-quality is our commitment.
