

B.

Quality in every single fiber

Supima® – the world’s finest cotton

Buhler is using the extra long staple Supima® cotton, which is perfect for high quality products and provides very important advantages:

- highest strength
- fine, long fibers (35 mm)
- smooth touch, brighter colors
- extremely low foreign fiber contamination

B.US Supima® <i>Ringspun</i>	Finest cotton from the western region of the United States. 100% combed extra long staple cotton (Supima). Ring-spun.	Ne 12–80	
B.US Supima® <i>Slub</i>	Fancy yarn from finest Supima cotton. 100% combed extra long staple cotton. Slub-spun.	Ne 20–50

B.US Supima® <i>TransDry</i>	Moisture-Management with pure extra long staple Supima cotton. Ring-spun.	Ne 16–80	 

All yarns are spun in the USA.

Micro Modal® – makes the world a softer place

Micro Modal®, the world's softest fiber:

- ideal for light textiles next to the skin
- softness and color brilliance remain even after repeated washing
- sustainably produced in Austria from renewable raw materials (European beech wood)
- made with 85% renewable energy (from waste wood and by-products of cellulose production).

	The yarn for soft and silky wear-comfort. 100% Lenzing Micro Modal. Ring-spun.	Ne 20–60	
	The best of two natural fibers. 50% combed, extra long staple Supima cotton, 50% Lenzing Micro Modal. Ring-spun.	Ne 20–60	
	The best of two natural fibers. 50% combed, extra long staple Supima cotton, 50% Lenzing Micro Modal. Slub-spun.	Ne 20–60	

Micro Tencel® – the new age fiber

Micro Tencel®, natural comfort and performance:

- inherent moisture movement due to high moisture absorption
- inhibits the growth of bacteria naturally without any addition of chemical substances
- produced from FSC-certified Eucalyptus wood
- award-winning for environmental friendly fiber production in a closed loop process
- smooth fiber surface for a minimum skin irritation

	100% Micro Tencel – the new age fiber. 100% Lenzing Micro Tencel. Ring-spun.	Ne 20–60	
	New age blend for functionality and comfort. 50% combed, extra long staple Supima cotton, 50% Lenzing Micro Tencel. Ring-spun.	Ne 20–60	

Leader in fine yarns from Supima[®] cotton, Micro Modal[®] and Micro Tencel[®]

Best

in performance due to quality of raw materials and spinning know-how

Beautiful

fabrics with excellent drape, superior strength and comfort

Better

- environmental footprint due to constant attention of our waste generation
- decreasing energy and water consumption
- working with fiber suppliers which have similar goals in reducing the environmental impact

Company philosophy

- excellent yarn quality, high reliability and perfect service
- dedication to meet customer's requirements
- highest level of integrity
- market driven product innovations
- manufacturing with "Best Practice" procedures at every stage of operation
