- stable dyeing characteristics

Quality certificates

- Supima®
- Cotton USA™

USSupima Ringspun is manufactured from finest American Supima®-Cotton. Yarns made out of this premium, extra long staple fiber can be knitted or woven into softer, finer and more luxurious fabrics. Because of the fineness of Supima® cotton, more fibers can be spun into a yarn of a given count, which will enhance the feel and softness, drapeability and color-brilliance of a fabric.

With USSupima Ringspun, highest productivity in subsequent processing and a perfect quality of the finished product can be achieved. The high fiber strength leads to an improved durability and an excellent performance in the finishing process.
