SwissCotton Compact® is distinguished by

- perfect yarn structure
- high yarn tenacity and elongation
- low lint fly
- highest productivity in weaving, knitting and warp knitting
- no visible foreign fiber contamination
- stable dyeing characteristics

Quality certificates

- SwissCotton Premium®
- swiss+cotton®
- Com4® (Rieter Com4)
- Supima®
- Cotton USA™
- Oeko-Tex Standard 100 plus

The leading Cotton yarn – worldwide! This is the target of SwissCotton Compact®! To reach this demanding goal, finest extra long staple Cotton is processed with the compact spinning system developed by Rieter. The result is convincing. By spinning all fibers firmly into the yarn, the hairiness is reduced and the tenacity improved.

SwissCotton Compact® provides substantial advantages in the production process. The low hairiness, combined with the high tenacity and elongation, allows highest productivity even in most critical applications. The optimum yarn structure supports the development of innovative materials and enhances your possibilities regarding hand and appearance.
