

*The perfect combination
of single and plied yarn*

SwissCotton Royal® combines the advantages of single and plied yarn

Count range	Ne 16/1 – 80/1 (Nm 28/1 – 135/1)
Spinning system	combed, royal-spun
Raw material	100% extra long staple cotton fiber length 34 – 38 mm
Origin	Switzerland

Royal-spun yarns are also available in
Micro Modal and Micro Modal/cotton blends.

Typical applications

- high-grade apparel (golf-shirts, color-woven fabrics etc.)
- luxurious intimate apparel, lingerie
- bed linen and other home furnishings
- hosiery products, socks

Quality certificates

- SwissCotton Premium®
- swiss+cotton®
- Supima®
- Cotton USA™
- Oeko-Tex Standard 100 plus

SwissCotton Royal® can be distinguished by

- yarn structure like a plied yarn, excellent yarn evenness
- higher yarn strength than single or plied yarns
- low yarn hairiness
- excellent pilling values
- perfect, clean fabric surface, nice sheen
- improved abrasion resistance
- much more economical than plied yarns

Royal-spun yarns from Bühler combine the advantages of single and plied yarns in a single product: Yarn evenness, strength and the low hairiness are similar to a plied yarn while the soft and gentle hand is like a single yarn. In addition, the usage of extra long staple cotton amplifies the advantages of royal spinning.

Increased quality in end products is the result of the royal-spun technology: By spinning all fibers firmly into the yarn, surface hairiness and pilling are reduced while the low yarn twist and the fine fibers of extra long staple cotton provide a soft hand and highest wearing comfort.

And last but not least: SwissCotton Royal® is not just for "Royals"! It is just a little more expensive than a regular ring-spun yarn, but with much added value.
